driverless intelligent cars and pdf
PC mag definition is: A computer-controlled car that drives itself. Also called an "autonomous vehicle" and "driverless car," self-driving cars date back to the 1939 New York World's Fair when General Motors predicted the development of self-driving, radio-controlled electric cars.

Self-driving car - Wikipedia
Since 2014, many companies have applied in California for testing self-driving cars. The list of companies which have received a permit can be used as a measure for the innovation process associated with autonomous vehicle technology.

Driverless car market watch | Gearing up to save lives
A driverless tractor is an autonomous farm vehicle that a delivers a high tractive effort (or torque) at slow speeds, for the purposes of tillage and other agricultural tasks. It is considered driverless because it operates without the presence of a human inside the tractor itself. Like other unmanned ground vehicles, they are programmed to independently observe their position, decide speed ...

Driverless tractor - Wikipedia
Treasure trove of data. Credit: Shutterstock One of the best ways to protect connected cars from this growing threat is by building security into the design of the vehicles.

Here's how we can stop driverless cars from being hacked
The new commute: How driverless cars, hyperloop, and drones will change our travel plans. By Charles McLellan
