Note: The dual degree requires twenty hours of technical electives. The twenty hours consists of: nine hours of approved aerospace engineering technical electives, nine hours of approved mechanical engineering technical electives, and the final two hours can be either aerospace engineering or mechanical engineering approved technical electives.

Stress is the force per unit area on a body that tends to cause it to change shape.. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...

Etymology. The word "biomechanics" (1899) and the related "biomechanical" (1856) come from the Ancient Greek βίος, bios "life" and μηχανική, mēchanikē "mechanics", to refer to the study of the mechanical principles of living organisms, particularly their movement and structure.. Method. Biomechanics is closely related to engineering, because it often uses traditional engineering ...

The de Broglie-Bohm theory, also known as the pilot wave theory, Bohmian mechanics, Bohm's interpretation, and the causal interpretation, is an interpretation of quantum mechanics. In addition to a wavefunction on the space of all possible configurations, it also postulates an actual configuration that exists even when unobserved. The evolution over time of the configuration (that is, the ...

A major step in highlighting the significance of tactile sensing technology and its possible applications was taken by Harmon in 1980 with his review. The potential of this technology was further emphasized by two more papers which followed shortly afterwards. The unavailability of any design criteria was still a major obstacle to progress.
