HP Prime User Guide - HPCC

This is the first tutorial in the "Livermore Computing Getting Started" workshop. It is intended to provide only a very quick overview of the extensive and broad topic of Parallel Computing, as a lead-in for the tutorials that follow it.

Introduction to Parallel Computing

The HP 35s is Hewlett-Packard's newest (2007) member of their family of non-graphing programmable scientific calculators, and is the first in a long time that looks and feels like an HP calculator should.

Review: HP 35s Programmable Scientific Calculator - Stefan V

Abaqus FEA (formerly ABAQUS) is a software suite for finite element analysis and computer-aided engineering, originally released in 1978. The name and logo of this software are based on the abacus calculation tool. The Abaqus product suite consists of five core software products: Abaqus/CAE, or "Complete Abaqus Environment" (a backronym with an obvious root in Computer-Aided Engineering).

Abaqus - Wikipedia

Basic Linear Algebra Subprograms (BLAS) is a specification that prescribes a set of low-level routines for performing common linear algebra operations such as vector addition, scalar multiplication, dot products, linear combinations, and matrix multiplication. They are the de facto standard low-level routines for linear algebra libraries; the routines have bindings for both C and Fortran.

Basic Linear Algebra Subprograms - Wikipedia

This is my second attempt at a large program for the new HP 35s programmable scientific calculator from Hewlett-Packard. My previous program addressed the curve fitting shortcomings of the 35s (compared to the HP-41C/CV/CX with Advantage Pac, or the HP-42S). This program is a start at doing the same for matrix functionality.

A Matrix Multi-Tool for the HP 35s Programmable Calculator

Our library is full of fantastic resources to help you better understand the technical aspects of load cells and how to use them. Please consult the menu list at the left for the documents you need.

The simpler equation for two resistors in parallel is much easier to use! Note that the combined resistance in parallel will always be less than any of the individual resistances.

Electronics - Mobile Friendly

0 - 9; Title Description Price Rating ; 2D Frame Analysis Dynamic Edition: This application uses a highly flexible, general, finite element method for static and dynamic analysis of multi span beams, 2D trusses and 2D frames.

The EPS insulation installed under the concrete slab of the first Passivhaus in Minnesota was 16 inches thick. It's likely that the energy required to manufacture the last 8 inches of this insulation will exceed the energy saved by the insulation over the next 50 years.
