Computer science is the study of mathematical algorithms and processes that interact with data and that can be represented as data in the form of programs. It enables the use of algorithms to manipulate, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems.. Its fields can be divided into theoretical and ...

A CBM program consists of three key steps (see Fig. 1): 1. Data acquisition step (information collecting), to obtain data relevant to system health. 2. Data processing step (information handling), to handle and analyse the data or signals collected in step 1 for better understanding and interpretation of the data.
