Survey respondents were asked to identify between three and six pairs of global risks they believe to be most interconnected. Read more about the methodology.

Global Risks Report 2017 - Reports - World Economic Forum

Most empirical knowledge of soil in nature comes from soil survey efforts. Soil survey, or soil mapping, is the process of determining the soil types or other properties of the soil cover over a landscape, and mapping them for others to understand and use. It relies heavily on distinguishing the individual influences of the five classic soil forming factors.
