### **Mathematical Theory of Incompressible Non-Viscous Fluids**

Our goal is to give a precise mathematical meaning to the notions of non-equilibrium steady state, entropy production and heat flux, study their properties and prove Relations (1) from first principles. We will also exhibit examples of combined systems,  $\dot{S} > 0$  which have strictly positive entropy production and hence non-trivial thermodynamics.

Probability calculus or probability theory is the mathematical theory of a specific area of phenomena, aggregate phenomena, or repetitive events. Certain classes of probability problems that deal with the analysis and interpretation of statistical inquiries are customarily designated as theory of statistics or mathematical statistics.
