

**operating rotodynamic pumps away pdf**

5 Fig 2. Onset of possible adverse effects when operating away from BEP 5. Details of pump types The following Tables 3 to 16 give details of the rotodynamic pump types listed in Table 1.

**GUIDE TO THE SELECTION OF ROTODYNAMIC PUMPS**

A pump is a device that moves fluids (liquids or gases), or sometimes slurries, by mechanical action. Pumps can be classified into three major groups according to the method they use to move the fluid: direct lift, displacement, and gravity pumps. Pumps operate by some mechanism (typically reciprocating or rotary), and consume energy to perform mechanical work moving the fluid.
