Welcome | Oracle Community

I currently had in a project a request, that Oracle Reports should be generated with the option `destype=file` to a specific location on the server which is hosting the Oracle Forms & Reports 12c environment.

Configure Oracle Reports 12c (12.2.x) for destype=file

Oracle Forms is a software product for creating screens that interact with an Oracle database. It has an IDE including an object navigator, property sheet and code editor that uses PL/SQL. It was originally developed to run server-side in character mode terminal sessions. It was ported to other platforms, including Windows, to function in a client-server environment.

Oracle Forms - Wikipedia

Oracle Corporation is an American multinational computer technology corporation headquartered in Redwood Shores, California. The company specializes primarily in developing and marketing database software and technology, cloud engineered systems, and enterprise software products – particularly its own brands of database management systems. In 2018, Oracle was the third-largest software maker ...
