- 30-3.2.2. Diseases of the female reproductive tract Examination of abattoir material provided some information about some of the diseases that could be encountered in the reproductive tract. Although this could be considered as biased information when referring to populations of camels in general, it could however provide useful information about the existence of these diseases.

Molybdenum disulfide (MoS<sub>2</sub>) thin-film transistors were fabricated with ion gel gate dielectrics. These thin-film transistors exhibited excellent band transport with a low threshold voltage (<1 V), high mobility (12.5 cm<sup>2</sup>/(V·s)) and a high on/off current ratio (10<sup>5</sup>). Furthermore, the MoS<sub>2</sub> transistors exhibited remarkably high mechanical flexibility, and no degradation in the electrical ...
