This article is about death in the different cultures around the world as well as ethical issues relating to death, such as martyrdom, suicide and euthanasia. Death refers to the permanent termination of life-sustaining processes in an organism, i.e. when all biological systems of a human being cease to operate.

Death and culture - Wikipedia

Death is the permanent termination of the complex biological functions that sustain a living organism. It is the end of life, and is usually followed by a period of decomposition. The process of death is often a gradual one, as the body's systems gradually shut down. In many cultures, death is considered a natural part of life, and is often accompanied by rituals and customs. The concept of death has been a subject of philosophical and religious inquiry for centuries. In modern medicine, death is often defined as the irreversible cessation of all brain functions, including the brainstem. This definition is used to determine when a person is legally dead. However, there is still debate about the exact point at which death occurs, and some people believe in the possibility of resurrection or an afterlife. The study of death and dying is a multidisciplinary field that involves biology, psychology, sociology, and philosophy. It is an important area of research because it helps us to understand the human condition and to cope with the loss of loved ones. The process of death is a complex one, and it is still a mystery to many people. Scientists are working to understand the biological processes that lead to death, and they are also studying the psychological and social aspects of dying. The study of death and dying is a field that is becoming increasingly important in our society. As the population ages, more people are dying, and it is important to understand the process of death and to provide the best possible care for the dying. The study of death and dying is a field that is full of challenges and opportunities, and it is a field that is worth pursuing.
