Preface The world of our every-day experiences "the world of the not too big (compared to, say, a galaxy), and the not too small, (compared to something the size and mass of an atom), and where nothing moves too fast (compared to the speed of light) " is the world that is mostly directly

Quantum Physics Notes - Macquarie University

Quantum entanglement is a physical phenomenon which occurs when pairs or groups of particles are generated, interact, or share spatial proximity in ways such that the quantum state of each particle cannot be described independently of the state of the other(s), even when the particles are separated by a large distance"instead, a quantum state must be described for the system as a whole.

Quantum entanglement - Wikipedia

In physics, a quantum (plural: quanta) is the minimum amount of any physical entity (physical property) involved in an interaction. The fundamental notion that a physical property may be "quantized" is referred to as "the hypothesis of quantization". This means that the magnitude of the physical property can take on only discrete values consisting of integer multiples of one quantum.

We propose a protocol for quantum state tomography of nonclassical states in optomechanical systems. Using a parametric drive, the procedure overcomes the challenges of weak optomechanical coupling, poor detection efficiency, and thermal noise to enable high efficiency homodyne measurement.

Welcome to Oxford Quantum! Oxford University is the UK's largest and most diverse centre for quantum research. We have 38 separate research teams, with a total of around 200 researchers.

Oxford Quantum

Quantum physics says that particles can behave like waves, and vice versa. Researchers have now shown

that this 'wave-particle duality' is simply the quantum uncertainty principle in disguise.

Quantum physics just got less complicated

It has sometimes been suggested that quantum phenomena exhibit a characteristic holism or nonseparability, and that this distinguishes quantum from classical physics.

Holism and Nonseparability in Physics (Stanford)

Studying in Bristol is an amazing experience. The university is one of the best in the country with excellent facilities which offer us a wide range of opportunities.
