In chemistry, a colloid is a mixture in which one substance of microscopically dispersed insoluble particles is suspended throughout another substance. Sometimes the dispersed substance alone is called the colloid; the term colloidal suspension refers unambiguously to the overall mixture (although a narrower sense of the word suspension is distinguished from colloids by larger particle size).

A double layer (DL, also called an electrical double layer, EDL) is a structure that appears on the surface of an object when it is exposed to a fluid. The object might be a solid particle, a gas bubble, a liquid droplet, or a porous body. The DL refers to two parallel layers of charge surrounding the object. The first layer, the surface charge (either positive or negative), consists of ions ...

Young Awards. ISSS-8 Young Researcher's Awards will be offered in the following two categories on a competitive basis. Anyone 35 years old or younger on October 22, 2017 is encouraged to apply as eligible (the date of birth will be checked by passport or appropriate photo ID at the conference site). An application must be made in the website for abstract submission.

### **ISSS-8 The 8th International Symposium on Surface Science**

The effectiveness of a colloid is predicated on particle surface area, therefore particle surface area is the single most important metric for comparing colloidal products. The Comparison Table below provides a detailed comparative analysis of products based on the particle surface area. In the booklet "Silver Colloids" Professor Ronald Gibbs wrote "The size of the particles in the colloidal ...

### **Silver Colloids: Colloidal Silver Product Reports**

Correction to the Gibbs Booklet: Frequently asked question: Dr. Ronald Gibbs booklet states that high-quality Colloidal Silver is colorless, but the highest particle surface area colloid in the tabulations is dark in color, why this discrepancy?. The material in Ron Gibbs book is slightly dated. Ron died in May 2000 and the book material was frozen about a year before.

Science Journal of Chemistry (SJC) , a peer-reviewed open access journal published bimonthly in English-language, provides a international forum for the publication of outstanding full papers from all areas of chemistry and related fields, and the attendant goal is to promote widespread acceptance of the Journal as an authoritative and indispensable holding in academic and institutional libraries.

### **Science Journal of Chemistry :: Science Publishing Group**

Science Journal of Analytical Chemistry(SJAC) provides a forum for the publication of scientific research and review articles. The journal publishes original full-length research papers in all areas related to theoretical and objects analyzed applied aspects of analytical chemistry. General issues contain critical review articles, news, meeting reports, book reviews and meeting announcements.
