A 'Thematic map' is a map that focuses on a specific theme or subject area. This is in contrast to general reference maps, which regularly show the variety of phenomenaâ€”geological, geographical, politicalâ€”together. The contrast between them lies in the fact that thematic maps use the base data, such as coastlines, boundaries and places, only as points of reference for the phenomenon being ...

### **Thematic map - Wikipedia**

Geovisualization or geovisualisation (short for geographic visualization), refers to a set of tools and techniques supporting the analysis of geospatial data through the use of interactive visualization.. Like the related fields of scientific visualization and information visualization geovisualization emphasizes knowledge construction over knowledge storage or information transmission.

An Isarithmic map is a type of Thematic map that represents a continuous field using line and/or region symbols to connect places of similar value. It is sometimes called a heat map, although the term heat map should only be used for one type of isarithmic map that represents density. In general, these maps are used to help visualize continuous data sets by utilizing color, especially hue and ...
