

### **urbanization and slums infectious pdf**

A slum is a highly populated urban residential area consisting mostly of closely packed, decrepit housing units in a situation of deteriorated or incomplete infrastructure, inhabited primarily by impoverished persons. While slums differ in size and other characteristics, most lack reliable sanitation services, supply of clean water, reliable electricity, law enforcement and other basic services.

Communicable diseases Urbanization and communicable diseases United Nations projections are that more than three-fifths of the world's population

### **Urbanization and communicable diseases**

Rapid urbanization is today's defining development trend. When USAID was founded in 1961, roughly 34 percent of the world's population lived in urban areas. By 2030, that figure will rise to over 60 percent as cities and towns become home to more than 1.4 billion additional people. Nearly all of this growth and movement will take place within the developing world, much of it in fragile states.
