Visual Studio includes a debugger that works both as a source-level debugger and as a machine-level debugger. It works with both managed code as well as native code and can be used for debugging applications written in any language supported by Visual Studio. In addition, it can also attach to running processes, monitor, and debug those processes. If source code for the running process is ...

Microsoft Visual C++ Redistributable Packages are required public DLL runtime libraries for any software written using Microsoft Visual Studio 20XX IDE, which can be interpreted as the dictionary files for running programs. And considering the application's file size, most of them do not come with those common DLL files.
