what your doctor may pdf

Researchers from Saint Louis University School of Medicine, Missouri have found that high triglycerides block leptin - a hormone secreted by our fat cells - from getting into the brain by impairing its transportation system (Diabetes, 2004: May). As a result, leptin cannot do its work in turning off feeding and burning calories.

Most people take breathing through their nose for granted. But for many chronic mouth breathers, breathing through the nose is a struggle, if not impossible. Not only is their quality of life diminished, but they also have a variety of other health-related conditions such as dry mouth, snoring, fatigue, and poor sleep.
