This paper gives a critical review of 25 years of critical accounting research on gender, addressing what we have learned to date and what are the most challenging areas to be investigated in the future.

Accounting as gendering and gendered: A review of 25 years

Backflush accounting is a certain type of "postproduction issuing", it is a product costing approach, used in a Just-In-Time (JIT) operating environment, in which costing is delayed until goods are finished. Backflush accounting delays the recording of costs until after the events have taken place, then standard costs are used to work backwards to 'flush' out the manufacturing costs.
